# ORCHID PLANTS

## SPRING PRICE LIST - 1948

Cattleya, Cymbidium, Dendrobium and Phalaenopsis plants in both seedling and mature sizes are offered in this spring list. Orders will be accepted now, although shipments will be made only when all danger of frost has passed.

All community pots are standard 4" pots, with a minimum of 10 plants per pot. Prices are based on this 10 plant minimum, regardless of the fact that more plants may be present. In this way, you always get at least ten plants for the price specified, but may get more.

The names of the hybrids listed follow those in the 1947 edition of Sanders where possible. For parentage of hybrids not given by Sanders, see our lists of hybrid names to appear in our advertisements in the American Orchid Society Bulletin during 1948.

Plants will be shipped by Railway Express on the mainland and by Air Express overseas unless otherwise specified. We qualify for shipments to Hawaii and need only your permit number to complete the shipment. Terms: cash with order; \$10.00 minimum; packing free of charge; shipping costs are in addition.

Plant No.	NAME AND DESCRIPTION	Price Per Pot
13	<b>CATTLEYA ENID (C. Mossiae x C. gigas)</b> These plants have proved to be good producers of cut flowers. Medium dark with some orange in the throat of the lip. Two blooming seasons, February-June and September-December. Mature plants in 6" pots.	\$35.00
21	<b>LAELIOCATTLEYA KEWAUNEE (LC. Helston A.M., M.O.S. x LC. Red Oak)</b> Plants of this hybrid bloom from September to March. The flowers are dark and have superior texture; many will be of exhibition quality when plants are of larger size. Mature plants in 4½" pots.	25.00
36	<b>LAELIOCATTLEYA SHAWANO (C. General Pulteney x LC. Nella)</b> The plants bloom from November to February. Flowers are medium dark, with darker lips and yellow markings in the throat. Mature plants in 5" pots.	27.00
44	<b>CATTLEYA MORNE LE BLANC (C. Edithae x C. Joan Manda)</b> These whites bloom mainly in the spring. They are vigorous plants producing two or three flowering leads for the blooming season. Flower quality is good. Many are worthwhile contemplating as studs. Mature plants in 5" pots.	50.00
54	<b>BRASSOLAEIOCATTLEYA LANGLADE (BLC. Gold Wings x BLC. Llewelyn)</b> Their large bold flowers appear throughout autumn, winter and spring, although they have a greater tendency to bloom in December and January. The flowers are of medium depth in color, but some plants are white with purple lips. Mature plants in 6" pots.	30.00

Plant No.	NAME AND DESCRIPTION	Price Per Pot
18	CATTELEYA ENID (C. Mossiae x C. gigas) These plants have proved to be good producers of cut flowers. Medium dark with some orange in the throat of the lip. Two blooming seasons, February-June and September-December. Mature plants in 6" pots.	\$35.00
21	LAELIOCATTELEYA KEWANEE (L.C. Helston A.M., M.O.S. x L.C. Red Oak) Plants of this hybrid bloom from September to March. The flowers are dark and have superior texture; many will be of exhibition quality when plants are of larger size. Mature plants in 4 1/2" pots.	\$25.00
26	LAELIOCATTELEYA SHAWANO (C. General Pulney x L.C. Nella) The plants bloom from November to February. Flowers are medium dark, with darker lips and yellow markings in the throat. Mature plants in 6" pots.	\$27.00
41	CATTELEYA MORNE LE BLANC (C. Edipae x C. Jean Manda) These whites bloom mainly in the spring. They are vigorous plants producing two or three flowering heads for the blooming season. Flower quality is good. Many are worthwhile contemplating as studs. Mature plants in 5" pots.	\$50.00
54	BRASSOLAELIOCATTELEYA LANGEADE (B.L.C. Gold Wings x B.L.C. Llewellyn) Their large bold flowers appear throughout autumn, winter and spring, although they have a greater tendency to bloom in December and January. The flowers are of medium depth in color, but some plants are white with purple lips. Mature plants in 6" pots.	\$30.00

Charles Orchids

Plant No.	NAME AND DESCRIPTION	Price Per Pot
58	<b>BRASSOCATTLEYA MARIE-MARIE var. PERFECTION x CATTLEYA ISABEL SANDER</b> Both parents bloom in the autumn. The Perfection variety of Marie-Marie has large flowers of good substance. Their color is light phlox throughout, except for clear yellow eyes in the lip. Isabel Sander has petals of Liseran purple with an almost dahlia purple expanded portion of the lip. The throat is marked with yellow eyes. Intermediate plants in 3" pots.	\$ 8.50
62	<b>CATTLEYA MONONA x LAELIA PURPURATA var. MARIE LOUISE</b> Both parents are spring bloomers with a desirable drying texture on aging. C. Monona has an enviable habit of compact growth within the pot. The second parent, in our experience, has been endowing its offspring with flushed petal tips. Intermediate plants in 3" pots.	7.50
122	<b>CATTLEYA RAPHAELEDA x LAELIOCATTLEYA RED OAK</b> Both parents have fine, bold flowers in the autumn and early winter. Their progeny are exceptionally vigorous and should bloom within 18 months. Intermediate plants in 3" pots.	10.00
125	<b>CATTLEYA FARCEUR x LAELIOCATTLEYA MARTINETII</b> This C. Farceur was derived from C. Suavior Aquinii, which is pure white with purple flushed petal tips and a dark lip. Martinetii is a bronzed type blooming in the late spring. Intermediate plants in 3" pots.	7.50
156	<b>LAELIOCATTLEYA LA CROSSE x LAELIOCATTLEYA RED OAK</b> Both parents have large, dark rose-purple flowers of heavy texture. The lip on the last parent has a frilled edge and bright yellow eyes. Autumn and early winter. Should bloom in 1949. Intermediate plants in 3" pots.	12.50
176	<b>LAELIOCATTLEYA NAKOMA x BRASSOCATTLEYA MRS. J. LEEMAN</b> Nakoma has bright yellow petals contrasted with a rich deep purple lip; the throat is marked with orange. A fine yellow form of the well-known Mrs. J. Leeman was used. Both bloom in the autumn. Seedlings in 2" pots.	4.50
181	<b>LAELIOCATTLEYA CANTAB x CATTLEYA DOWIANA var. AUREA</b> The Cantab parent bears well-formed, phlox colored flowers of heavy texture and pleasing fragrance. Summer. Seedlings in 2" pots.	3.00
184	<b>LAELIOCATTLEYA ISFIELD x CATTLEYA MONONA</b> Two spring blooming parents of great vigor and free-flowering characteristics. Both have medium dark flowers. Large seedlings in communities ready for 2½" pots.	22.50
187	<b>LAELIOCATTLEYA SAM HOUSTON x BRASSOLAEIOCATTLEYA ISH-BEL</b> The rich purple lips of the summer-flowering Sam Houston are brightened with clear yellow eyes. BLC. Ishbel blooms in the spring. It has good color and texture, and a very desirable growth habit. Seedlings in 2" pots.	4.50

Plant No.	NAME AND DESCRIPTION	Price Per Pot
188	<b>CATTLEYA OLIVE PIERSON x CATTLEYA LADY VEITCH</b> Both parents are whites of pleasing form and texture. Lady Veitch regularly blooms several times a year. Large seedlings in communities ready for 2½" pots.	\$22.50
193	<b>LAELIOCATTLEYA KENOSHA x CATTLEYA ENID var. ALBA</b> Clear white petals and sepals with deep purple lips characterize both of these autumn-blooming parents. Large seedlings in communities ready for 2½" pots.	27.50
234	<b>LAELIOCATTLEYA WINNEBAGO x LAELIOCATTLEYA RED OAK</b> This is a mating between two autumn-blooming parents. The Winnebago parent has flushed petals and sepals and purple lips brightened with a large yellow area at the throat. The plant of Red Oak has well formed medium dark flowers with deeper colored lip and traces of yellow in the throat. Seedlings in community pots.	22.50
230	<b>CATTLEYA HARDYANA x CATTLEYA TOWER</b> The Hardyana is a free-flowering plant, producing medium dark flowers with velvety lips strikingly eyed with yellow. The Tower plant produces dark flowers of good texture in the autumn. The lip is reddish purple marked with golden yellow veins in the throat. Seedlings in community pots.	17.50
219	<b>CATTLEYA PRINCESS ROYAL x BRASSOCATTLEYA JUNEAU</b> Both parents have flowers of medium size and of good shape and texture. Both bloom in May or June and have white petals and sepals with purple lips marked with yellow eyes. Seedlings in community pots.	20.00
346	<b>LAELIOCATTLEYA MEM. PETER SANDER (LC. Aconcagua x C. Hardyana alba)</b> This hybrid blooms in the first month of the year, the flowers being white with purple lips marked with yellow. Each plant breaks repeatedly so that a small plant quickly comes to have many flowering leads. Mature plants in 6" pots.	50.00
4	<b>CYMBIDIUM ALEXANDERI var. WESTONBIRT x CYMBIDIUM PEREGRINE</b> The plant of Peregrine used to mate with this famous variety of Alexanderi is a fine early-blooming type. Both parents are of great value for cut flower purposes. Seedlings in 2½" pots, ready for transplantation to 3½" pots.	10.00
2146	<b>CYMBIDIUM VENUSTULUM (Cymb. Vesta var. Rosy Morn, A.M., R.H.S. x Cymb. Profusion)</b> Pink petals with deep pink veins contrast well with the reddish-purple markings on the lip of the free-flowering hybrid. Mature plants in 6½" pots.	30.00

188	CATTLEYA OLIVE PIERSON x CATTLEYA LADY VEITCH Both parents are whites of pleasing form and texture. Lady Veitch regularly blooms several times a year. Large seedlings in communities ready for 2 1/2" pots.	\$22.50
192	LAELIO-CATTLEYA KENOSHA x CATTLEYA ENID var. ALBA Clear white petals and sepals with deep purple lips characterize both of these autumn-blooming parents. Large seedlings in communities ready for 2 1/2" pots.	\$7.50
234	LAELIO-CATTLEYA WINNEBAGO x LAELIO-CATTLEYA RED OAK This is a mating between two autumn-blooming parents. The Winnebago parent has flushed petals and sepals and purple lips brightened with a large yellow area at the throat. The plant of Red Oak has well formed medium dark flowers with deeper colored lip and traces of yellow in the throat. Seedlings in community pots.	\$22.50
230	CATTLEYA HARDYANA x CATTLEYA TOWER The Hardyana is a free-flowering plant, producing medium dark flowers with velvety lips strikingly eyed with yellow. The Tower plant produces dark flowers of good texture in the autumn. The lip is reddish purple marked with golden yellow veins in the throat. Seedlings in community pots.	\$17.50
219	CATTLEYA PRINCESS ROYAL x BRASSO-CATTLEYA JUNEAU Both parents have flowers of medium size and of good shape and texture. Both bloom in May or June and have white petals and sepals with purple lips marked with yellow eyes. Seedlings in community pots.	\$20.00
246	LAELIO-CATTLEYA MEM. PETER SANDER (L.C. Aconageus x C. Hardyana alba) This hybrid blooms in the first month of the year, the flowers being white with purple lips marked with yellow. Each plant breaks repeatedly so that a small plant quickly comes to have many flowering heads. Mature plants in 6" pots.	\$20.00
4	CYMBIDIUM ALEXANDERI var. WESTONBIRT x CYMBIDIUM PEREGRINE The plant of Peregrine used to mate with this famous variety of Alexander is a fine early-blooming type. Both parents are of great value for cut flower purposes. Seedlings in 2 1/2" pots, ready for transplantation to 3 1/2" pots.	\$10.00
2146	CYMBIDIUM VENUSTULUM (Cymb. Vesta var. Rosy Morn, A.M., R.H.S. x Cymb. Profusion) Pink petals with deep pink veins contrast well with the reddish-purple markings on the lip of the free-flowering hybrid. Mature plants in 6 1/2" pots.	\$20.00

Plant No.	NAME AND DESCRIPTION	Price Per Pot
2163	<b>CYMBIDIUM PAPILLON</b> (Cymb. Butterfly var. Regina x Cymb. Ceres var. F. J. Hanbury)	\$30.00
	The flowers of this hybrid range through yellow-green, yellow, and pink. The lips are variously marked with purple and reddish purple. Mature plants in 6" pots.	
2169	<b>CYMBIDIUM GREEN SCAMP</b> (C. Lowio-grandiflorum x C. Mirabelle)	32.50
	The flowers are green or yellow-green and may be veined or flushed with brown. The background of the lip is cream and is brightened by a reddish brown Lowianum type marking. Mature plants in 5" pots.	
3023	<b>CYMBIDIUM JEREMIE</b> (Cymb. Evelyn x Cymb. Charm var. Bruges)	27.50
	Flowers are flushed and veined with pink. The lips are marked with areas of reddish-purple. Mature plants in 5" pots.	
90	<b>DENDROBIUM PHALAENOPSIS</b> (species)	4.00
	This old favourite was one of our best-sellers last season. Purple flowers on long-lasting sprays are born throughout the year. Seedlings in 2½" pots.	
1412	<b>DENDROBIUM DERONVILLE</b> (D. Lady Coleman x D. Queen of Gatton)	25.00
	An early spring blooming hybrid of the nobile type. When handled properly the plants produce a good number of flowers per cane. Mature plants in 3" pots.	
113	<b>PHALAENOPSIS PLAISANCE</b> (P. Reve Rose x P. Elizabethae)	22.50
	This is a hybrid between a pink of large size and pleasing shape and a white which has good texture and size to contribute. It is intermediate in most respects. Mature plants in 5" pans.	
197	<b>PHALAENOPSIS BOULDERI</b> (Phal. Venustus x Phal. Elizabethae)	17.50
	Both parents used in this cross have large white flowers with good substance. The plants are ready for transplantation and should bloom within a year. Seedlings in community pots.
